What makes us so special?

Our expert team, who has worked in the Software, IT and Education sector for many years, also had the opportunity to closely observe the problems and deficiencies in the education sector. These experiences are shared with you. **Let's build your future together!**

Real Software Project Experience!

A man's knowledge cannot go beyond his experience. That's why with this quality you will differentiate yourself from others. **In addition, there is the possibility of working as a software developer after your graduation in ongoing final projects If the partner company wants !.**

Letter Of **Reference**!

In addition, upon completion of their studies, students receive a **letter of reference** from the company whose software is developed.

Opportunity To Study In The Same Class With Two Instructors **At The Same Time!**

Our aim is to provide high quality education. Out target to provide education in classrooms where students can ask questions comfortably and instructors have the opportunity to engage one-on-one.

Laptop & Programs

We provide our participants with a laptop and all programs for your classes and projects.
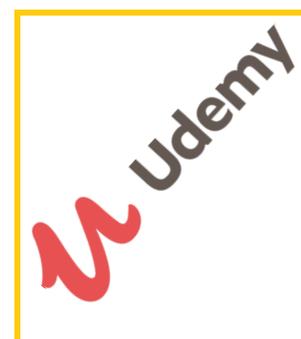

Full Career **Support**!

We help you in securing a job through our hiring partners and our coaching consultants since the beginning of the course. We will always be with you on your career path.

Udemy Account

We support participants to develop themselves in their SPARE TIME with Udemy e-learning account so that they can access more than 9,000+ other resources. This is a service provided so that participants can **ACCESS DIFFERENT EXTRA RESOURCES!**

DON'T MISS OUT,
SECURE YOUR
SPOT NOW!

Requirements for participation?

No Experience Required!

No prior experience required. It doesn't matter whatever your background is and it is never too late for fresh beginnings.

Language Level!

English level B1 is enough. Our current training is in English.

To check your level, you can use this link for free:

https://test.berlitz.com/placement/

Our German classes will open soon (in 2024).

- The lessons are mostly practical and our lecturers make their lectures by showing the codes on the screen. You can see how the explained topics work on the screen. **Therefore, visual understanding is more important than listening!**

Duration (for participants with Bildungsgutschein)

12 months (8 months Theory + 4 months Real Software Project) , including an internship. The program consists of all modules, totaling **45 weeks** except holidays, with 8 teaching units(UE) between **9:00-16:30 per day**, amounting to **40 hours per week**.

Location Free!

Our courses are **ONLINE** and you can participate anywhere!

Course content:

Curriculum: **Full (MERN) Stack Web Development**

- Learn the fundamentals of Information and Communication Technology, Web Development, and Tools for learning.
- Design and build websites using **HTML, CSS,** Preprocessors, and modern CSS Frameworks (**SCSS**), **Bootstrap 5**.
- Work with agile project management.
- Learn the foundations of programming using **JavaScript** ESnext and how to create dynamic websites.
- Work on projects using **Git** and Version Control.
- Learn all about Servers, Databases, how to deploy and scale Data-Servers.
- Moreover, learn about **DOM, APIs, React Js EcoSystem, Redux, Node Js, Express Js, Docker, Mongo Db, MySql**…etc
- Improve your soft skills such as communicating with a team, working together with different cultures, giving compelling presentations, and presenting yourself with confidence.

Present the part you developed in the Final Project in front of potential employers!

What does the <mark>Web Developer</mark> actually do?

A Full-Stack Web Developer is a **programmer** with a fundamental understanding of all layers of an application, with each layer referred to as a **"Stack."**

Full-Stack Web Developers have the ability to design complete web applications, web based softwares and websites, requiring both **front-end** and **back-end** skills. They work on database management and troubleshooting of web applications or websites.

<mark>Why now</mark> is an especially <mark>great time</mark> to become a <mark>web developer</mark>?
